

# Writing instruments made of antibacterial plastic.

ISO 22196 certified,  
hygienic and offering product protection for life.

**Be safe.**

**prodir®**

Antibacterial, hygienic surfaces are nowadays particularly important. That is why we have developed a whole portfolio for you right away. With new models, exciting new combinations and options that allow you to communicate what really counts:

The plastic surfaces of our writing instruments are protected by Biomaster antimicrobial/antibacterial technology. Biomaster is the world's most trusted additive, tested and certified to ISO 22196 providing durable and effective surface protection 24/7 for the lifetime of the product.

## How does Biomaster work?

1

Biomaster binds the cell walls disrupting growth.

### How effective is Biomaster?

Very effective. Biomaster is proven to inhibit the growth of bacteria by up to 99.99%.

### Is Biomaster safe?

Yes. It is based on silver ion technology, recognised for centuries with no harmful effects. Biomaster is used in medical, food and water applications.

### Has Biomaster been tested?

Yes, repeatedly. Biomaster is tested to ISO standards and is subject to continuous quality control tests and environmental trials.

### How long is Biomaster effective?

Biomaster is effective for the whole lifetime of the pen.

### Does Biomaster affect a product in any way?

No. You can't see, smell or even taste Biomaster.

### Is Biomaster effective against antibiotic-resistant bacteria?

Yes. Biomaster has been proven to be effective to antibiotic-resistant bacteria.

### Does Biomaster use nano-silver technology?

No. No nano technology is used due to ongoing safety concerns.

### Why is Biomaster better than other silver-based antimicrobial additives?

Biomaster pioneered the use of antimicrobial additives and remains the recognised leader and most trusted supplier of antimicrobial technology for polymers, textiles, paper, paints and coatings.

Please note, that Biomaster is tested to ISO 22196 providing efficacy against a wide range of microbes including bacteria. Efficacy against ISO 21702 for viruses is ongoing.

More about Biomaster [here](#)!

2

The Biomaster ions interfere with the enzymes production stopping the cell producing energy.

3

Biomaster interrupts the cell's DNA preventing replication.

Effective and save.

# All DS models All QS models

All models are available with antibacterial finish in both standard and special colours from a minimum order quantity as the one of the special colours of each model.\*

\*Please refer to the next page for more information.

# Good to know

.....

Writing instruments with antibacterial surface protection can be recognised by the imprint or the relief „antibacterial“ on the surface.

Exceptions are the models QS40 Air and QS01 which have a single print area on the clip. In this case, to identify the pen as antibacterial, we recommend the use of packaging or a simple cardboard case.

.....

For a very special and personal thank you, cardboard cases for the QS50 can be individually personalised by hand with each single name up to 500 pieces. We would be pleased to make you an offer.

.....

Antibacterial surface protection is not available for DS3 Biotic and QS Stone models, for varnished or Soft touch surfaces, and for metal components such as clips, nose cones and buttons.

.....

All writing instruments are equipped ex works with high-quality, low-emission Floating Ball® 1.0 mm Lead Free refills. Other refills from the 2020 catalogue are optionally available.

.....

The casing of all our writing instruments is made from at least 30% recycled plastic.

For our Regeneration Pens the percentage is 100%.
